## PROJECTS

### GroupChat | MEAN

Real-time chat room website where users enter a username to chat with other users using the application. **Technologies Used:** JavaScript, Express.js, Node.js, Socket.io, Twitter Bootstrap, HTML5 and CSS3.

### Star Repository | MEAN

A simple web application that allows users to create a post and comment on other users' posts. Keeps track of how many comments there are and shows five posts with the most comments. **Technologies Used:** JavaScript, Express.js, MongoDB, Mongoose, Angular 4, Node.js, HTML5, and CSS3.

### Day Trip | Django/Python

Web application that utilizes Google Maps and Google Places API to create a single day trip. **Technologies Used:** Python, Django, JavaScript, SQLite, jQuery, Twitter Bootstrap, HTML5, and CSS3

## EXPERIENCE

### Abaxis, Union City - Chemist (Through West Valley Temp Agency)

June 2014 - June 2015

- Made chemical formulations required for lateral flow devices.
- Assembled devices and performed quality control
- Compiled and analyzed data retrieved from quality control tests
- Assisted rotor department with quality control

## EDUCATION

**Coding Dojo, San Jose, CA** — Certificate of Completion (Triple Black Belt Graduate - Highest Honor)

### *Web Development Program*

Successfully complete an intensive web development program, devoting more than 1000 hours into coding. Focused on 3 full-stacks: Python, MEAN, and Ruby On Rails. Earned black belts on all of the stacks, which required near perfect scores on exams involving building an application within four hours.

### **University of California, Santa Cruz | 2010 - 2014**

Bachelor of Science, Chemistry

## TECHNICAL SKILLS

### Languages:

Python  
JavaScript  
Ruby  
HTML/CSS  
Knowledge of C++
